Research Associate (f/m/d) at the Chair of General Practice I and Interprofessional Care of the Institute of General Practice and Primary Care (IAMAG), Witten.

- Full-time
- Alfred-Herrhausen-Straße 50, 58455 Witten, Germany

Witten/Herdecke University is Germany's first privately funded university (founded in 1982) with more than 800 employees and over 3,000 students.

Our contribution to research and teaching at UW/H is important to us and we do our work with pleasure and high quality standards. We would like to strengthen our team. The topic areas we work on are broad and includes different practice-oriented research fields like palliative care, the management of chronic diseases and social topics such as healthcare of vulnerable populations (migrants, refugees and people living with financial problems).

The position can be started on 01.01.2023, preferably in full-time (40 hours per week). The employment is limited to one year, an extension is sought.

Your tasks

In collaboration with an interdisciplinary team, you will implement a newly starting and financially supported research project on primary care for Ukrainian refugees. Within the framework of this project, the experiences of refugees from Ukraine with the German healthcare system and especially with primary care will be gathered and information and support needs will be discussed.

This includes among others:

- Project organization and implementation
- Conducting qualitative individual interviews with refugees (probably in English)
- Preparation of project documents (e.g. study information, interview guidelines)
- Planning and implementation of a workshop with experts in the field, networking
• Evaluation and publication of the study results
• Presentation of the study results at (inter-)national conferences
• Collaboration on funding applications for the continuation of research activities

Your profile

• Completed university studies in public health, psychology, social sciences, sociology or a related subject (Master's degree or equivalent)
• Upon agreement and if methodological qualifications are met and full-time work is guaranteed, support for a master's thesis within the project can be given
• Experience and confidence in qualitative research methods, especially in conducting and analyzing qualitative individual interviews
• Experience in conducting scientific projects in the health field, if possible among vulnerable population
• Publication experience is desirable
• Confident handling of MS-Office and MAXQDA
• Very good knowledge of written and spoken German and English, Ukrainian or Russian language skills are an advantage
• Communication skills and organizational talent
• Self-initiative as well as an independent and structured way of working
• Team orientation, ability to work in a team, reliability, sense of responsibility, flexibility

We offer

• Innovative research work to improve outpatient health care for Ukrainian refugees in Germany
• Flat hierarchies and a supportive working atmosphere
• A modern workplace including a terrace area that encourages freedom and creativity in one of the most sustainable university buildings in Germany
• A friendly, good-humored and diverse team in which we are used to supporting each other
• An emphasis on personal initiative and discretion within the framework of mutually agreed goals
• Extensive opportunities for further training and education through internal and external training courses
• Work-life balance (flexible working hours and home office options)
• Above-average number of vacation days (30 days annual vacation plus 3 bridge days off)
• Reimbursement of childcare costs of up to 200 euros per month (depending on salary level and age of child)
• Company pension plan
• Promotion of environmentally friendly mobility (bike leasing, rental of e-cars, etc.)
• A discounted job ticket for local public transport

Contact
If we have aroused your interest, we look forward to receiving your application by 23.11.2022. Please use only the application form on our website in the section job offers “Stellenangebote”.

Prof. Dr. med. Klaus Weckbecker
Chair of General Practice I and Interprofessional Care
Institute of General Practice and Primary Care (IAMAG)

Diversity concept

Witten/Herdecke University explicitly lives the idea of diversity (www.uni-wh.de/diversity). It pursues the goal of promoting the diversity of its members and takes into account the competencies and special features they bring with them, e.g. due to their age or physical constitution. An increase in the proportion of women among the scientific staff is proactively pursued.
